

I am strongly opposed to proposed Senate Bill 427 .

Water is a public resource, belonging to the people of Connecticut. It must be managed sustainably for the benefit of it's citizens, not for the profit of a few. This bill attempts to circumvent the water plan's balanced and scientific approach to state water decisions and override the principle that our state waters are a resource to be protected and managed for all.

Please reject this ill conceived bill.

Respectfully,

John Robinson
