

Dear Members of the Environment Committee:

I am writing in strenuous opposition to SB 427, which would limit our environmental protection act and privatize water in all CT wells. Water, like air, is a public-trust resource, and CT's water is one of our most attractive resources. Abundant clean water, for human consumption, for animals and plants, and for recreation is an asset that cannot be valued.

Please do not make an end run around the CT state water plan; kill SB 427.

Sincerely,

Guthrie Sayen
