Explanation

The amendment creates a new felony for the sale and possession of a rate of fire enhancement and results in potential cost and potential revenue from fines. To extent that violators are prosecuted, the amendment results in a potential cost to the Department of Correction for incarceration or Judicial Department for probation supervision. On average, the marginal cost to the state for incarcerating an offender for the year is \$1,900¹ while the average marginal cost for supervision in the community is less than \$700² each year.

¹ Inmate marginal cost is based on increased consumables (e.g. food, clothing, water, sewage, living supplies, etc.) This does not include a change in staffing costs or utility expenses because these would only be realized if a unit or facility opened.

² Probation marginal cost is based on services provided by private providers and only includes costs that increase with each additional participant. This does not
