Explanation

The amendment strikes the underlying bill and its associated fiscal impact.

The amendment, which requires DDS to develop three pilot programs for residential services within available appropriations and specifies that any resulting cost savings generated by a provider may be retained and used to meet the needs of additional eligible individuals, has no net fiscal impact.

Under the pilot programs DDS consumers may to move to less

restrictive and less expensive alternative residential service models.¹ In turn, the savings which result from these changes in residential service will be used to fund additional DDS consumers who are waiting for services.

The number of individuals who will in the pilots and the cost differential between their current and future setting is not known at this time. Therefore, the potential savings resulting from the alternative settings and potential costs of the newly provided services cannot be calculated at this time.

The preceding Fiscal Impact statement is prepared for the benefit of the members of the General Assembly, solely for the purposes of information, summarization and explanation and does not represent the intent of the General Assembly or either chamber thereof for any purpose. In general, fiscal impacts are based upon a variety of informational sources, including the analyst's professional knowledge. Whenever applicable, agency data is consulted as part of the analysis, however final products do not necessarily reflect an assessment from any specific department.
