Subject: HB 5416 – please OPPOSE legislation that attacks pro-life pregnancy centers

In regards to the attack on pro-life pregnancy centers, it has been said that abortion should be safe and rare, yet we know that the opposite is true. The abortion industry commits nearly a million abortions annually, and there is a long list of negative side effects from legal abortions that have been performed including death of the mother. Attacking those fighting on the side of life is completely wrong.

I urge you to please oppose any restrictions on pro-life pregnancy centers. Help them to provide their needed services. Support their goodwill to pregnant mothers and their innocent babies. Please stop individuals and agencies that want to restrict these vital services.

Thank you.
