

To Whom It May Concern:

I can personally attest to the honest practices done by ABC Women's Center as I have spent time there myself. The staff there are compassionate and care about each person who walks through the door. They provide various health services at no cost and support the women and their families as they go through the tough times.

The false claims being brought forward against pregnancy centers are unfounded and are coming from people with an agenda who have never even been to a pregnancy center. Pregnancy centers do not deceive women in their services nor in their advertising. They merely give women other options and try to help women who choose not to have an abortion.

Please consider my testimony on the integrity of pregnancy centers.

Thank you for your time,
Jennifer
