

Dear Legislators - Please support H.B. 5417! Medical aid in dying is long overdue. We allow veterinarians to "put animals to sleep" to save them from needless suffering; we should allow the same for humans, for heaven's sake!

My mother-in-law has a degenerative disease of the brain. She should have medical aid when she wants to end her suffering.

Please support H.B. 5417.

Sincerely, Elizabeth Gardner
