

I strongly support the passage of the above-named HB 5417. Although I'm not far from 80, I'm healthy, active, and enjoying every minute of life. But we are all mortal. When the time comes I want the freedom to end my life if that is my choice. Those I leave behind should not feel a guilty relief—as I have witnessed in other families. Connecticut needs to join the other states which have enacted similar legislation. Please pass this bill.
