

To whom it may concern,

I am writing to strongly urge support of S.B. No. 298, .

In a day and age where every conceivable whim is being thrown around as a "right," I truly wonder why the simple, very real right of a parent to bury his or her miscarried child is even a question.

This is not only not a whim, it is even considered a sacred duty for many Christians, Jews, and people of other faiths who are obliged to show respect for their loved ones in life and in death.

It is also an important way to help grieving parents mourn and recover after their loss.

I am asking for your compassion and support for S.B. 298.

Thank you for your time,

—Karen Anderson
