

Hi Public Health Committee,

Happy Spring! (if you are reading this Tuesday) Though it doesn't feel much like it. I hope you are all living up to your name and staying healthy through this cold weather.

I want to briefly convey my support for S.B. no. 298. My wife and I have lost two children due to miscarriage, the last one only a few months ago through a D&C procedure, and having the ability to bury them would have certainly provided meaningful closure to a very painful experience. Further, I believe it is the right of a mother or parents to bury or cremate the remains of their child in the way they see fit as long as it is done properly and legally.

Thanks!

Ian Keogler
