

PUBLIC TESTIMONY before the Committee on Aging 2/19/19
from Isabelle Menozzi, Roxbury, CT,
**IN OPPOSITION to HB 7101-AN ACT CONCERNING FLU SHOTS FOR
SENIOR CITIZENS PRIOR TO HOSPITAL DISCHARGE.**

Distinguished committee members, I want to thank you for this opportunity to address HB 7101.

I am a parent, a Certified Health Coach and a health freedom advocate! I care deeply about the health and wellness of my community and beyond. I frequently educate and empower people to lead healthier lives by creating a non toxic environment. For the past 10 years my focus has been to research extensively nutritional and environmental science. Through this work I discovered the deep complexities of the pharmaceutical and giant chemical manufacturers.

As we watch the health decline of so many people around us, the reality of our health is that the United States is sicker than ever. The U.S. spends more than any other country on healthcare yet has more chronic health issues than any other country. Half of all adults in the U.S. have a chronic illness, and nearly half will eventually die of cancer. Alzheimer rates and other neurodegenerative disorders are skyrocketing. What is going on?

States have allowed the influence of corporations to poison this planet. Just as Monsanto knew that their product RoundUp causes cancer and failed to disclose it, heads of Pharmaceutical and health agencies such as WHO, HHS, CDC, FDA knew that vaccines had not been properly tested ever.

We all know that the pharmaceutical industry spends enormous amounts of money on lobbying. Currently there are 113 vaccine related bills across 27 States, 18 bills filed in 10 states which are removing or restricting religious freedoms and 3 states under a very real threat of a bill to remove exemptions. Laws supporting these giant companies start right here, in State Houses.

Allow me to be blunt here, we have a giant corporation takeover in this country, and this world. Can we just cut off the ties that bound you to corporations? It is pretty clear to me that the agenda is to sell more and more vaccines, 300 new ones in the pipeline. With mandates, insurance quotas and other systematic bureaucracy this will ensure a successful market for all the government and Pharma. I know, deep in your hearts, you know this is wrong. I am sure many of you went into this career to create a better state for the citizens. Please pay attention to us, the people.

I understand this bill is about ensuring that hospitals offer senior citizens flu shots but I just see it as just selling more vaccines. In case you haven't been to a hospital lately, **everyone**, not just seniors, are constantly offered flu shots. From triage, to intake,

through treatment, to discharge. This is forced consumerism, and not at all in the interest of public health.

Seniors (and the general public) get flu shot propaganda **everywhere** they go already. What state interest does this serve?

Flu vaccine efficacy has been historically low, **especially** in seniors. The Flu vaccine is the **least accepted** yet **most compensated** vaccine from the National Vaccine Injury Compensation Program, with four in ten of the reported non-fatal injuries being highly debilitating and potentially life-threatening injuries like Guillain Barre Syndrome. Studies have linked GBS to flu vaccines for many years, suggesting plausible biological mechanisms to explain the relationship.

What about informed consent? Will the non-physician person administering the vaccine know crucial health information about the patient? The VIS is not a good enough source information for true informed consent.

According to the EPA's guidelines one would have to weigh 550lbs to safely process the 25mcg of mercury in a flu vaccine. Mercury toxicity can cause memory loss, depression, ADD, oral health problems, digestive imbalances, respiratory problems, cardiovascular diseases and many more such serious health ailments.

Clearly the Influenza vaccine is neither safe or effective. This has pharmaceutical profit written all over it and is not for the health of citizens at all. Instead of mandating pressure on seniors, please educate them on optimum nutrition, hydration, exercise, all which would lead to a strong immune system. Health doesn't come in a shot, it starts with a non toxic environment and immune system.

Thank you for your service

Isabelle Menozzi
