To whom it may concern,

The stay well health center in the schools that they are located in have helped me and many other students. For example, I was recently tested for strep throat and I wouldn't have knew if stay well didn't make an appointment for me. The Health Center makes it easier for my family and other families to get appointments completed. The Dental program here is amazing I never thought that I could get a cleaning for my teeth checked in school. I really am grateful to have this clinic in my school. Cutting the clinic budget would be terrible because families would have to spend tons of money to take us to unnecessary appointments. If the stay well health centers budget is cut you will be putting many students health in risk and making parents use their money.

To Whom It May Concern:

I’m writing to commend the Staywell School Based Health Clinic at Wilby High School. The staff is friendly, courteous and very knowledgeable. They go out of their way to see all students that are referred to them. To have medical staff on hand during the school day is a wonderful addition to any school. Most parents and guardians are working while their children are in school and this makes it easier on them. In my opinion all schools should have a school based clinic.

Please do not cut their budgets. This would have a large impact on many students who may not get the medical care they need.

To Whom It May Concern:

I'm writing because I heard that budget cuts could close school based health clinics.

To have medical staff on hand during the school day is an incredible opportunity for children to get medical care they might not have been able to get. Most parents and guardians are working while their children are in school and this makes it easier on them.

In my opinion all schools should have a school based clinic.

To whom it may concern:

The school based health center has helped me in many ways. For example, by the having Staywell Health Center at my school, I am able to attend my medical, dental, and behavioral health appointments without missing a day of school. It is an easy and convenient way for me to get all of my health care needs met as I would normally have to go someone where else to receive this kind of care. My behavioral health therapist is also located at the school based health center and this has helped me so much with dealing with my emotions. Since I have meeting with my therapist, I have been trying more in school and my grades are getting better.

Thank you for reading my letter.

Sincerely,

Bryan A. Peralta

Student at Wilby High School in Waterbury, CT
