

Connecticut is now recognized as the worst state in the union in terms of government mismanagement that is driving able taxpayers and businesses out of the state.

It is hard to imagine that you can add to your list of failures but the proposed Forced Regionalization of our schools will be a new low.

The proposed new bills : SB 874, SB 738 and SB 457 seeking to combine Wilton with Norwalk, New Canaan with Darien and Weston with Westport are a disaster that will drive still more taxpayers out of Connecticut further eroding it's already diminishing tax base. They also display an incredible level of ignorance as to why families choose to reside in these towns in the first place.

Parents want the best education possible for their children and choose to move to a Wilton, New Canaan or Weston despite their high taxes and inconvenient location regarding daily commutes to Manhattan and elsewhere. These parents are also active supporters, volunteers and coaches for their childrens schools all on a gratis basis.

What is it about these realities that you do not understand ?
