

Bill 457 and Bill 738

I am writing about the current proposal to regionalize school districts. As a teacher and parent , this is not the direction our state should be going in. With mass exodus from Connecticut , one of the few things that keeps many here are the schools. We pay tens of thousands to live in a small town and have superior schools. We will be the first to leave if those proposed bills goes though. Government officials who are not educators should not be making decisions for our states' students. There are many other programs to cut, leave our schools alone.
