

Bill 457 and Bill 738

I have read about various proposals to mandate regionalization of certain school systems in CT. Combining school districts might make sense for certain towns, but that should be on a voluntary basis, not mandated. These proposals continue a pattern of CT State government imposing rules, regulations and unfunded mandates which restrict the ability of municipalities to innovate and cut costs. Specifically, I recommend repeal of binding arbitration, minimum budget requirements and any curricular mandates. I am opposed to any state mandated regionalization.
