

Please register my opposition to bills forcing School Regionalization. Children are our future and their education is best managed locally, where parents interact with local officials and educators. Regionalization not only dilutes and diffuses the allocation of funds and resources, but conflicts with the heritage of local control and parental influence, replacing it with a greater, centralized State role. These bills, along with the taxes, tolls and the increasing trend towards "forcing" taxpayers to submit to the Democratic Life Control agenda, is contrary to our culture, values and the Constitution. Thank you, Steven Loban. Naugatuck
