

Bill 457 and Bill 738

To whom it may concern,

I strongly DISAGREE with these bills and they should NOT be passed. I am a single parent who scraped and saved for years to be able to afford to move to Middlefield so my daughter could go to school in the Region 13 school district. We lived in Meriden and I felt very strongly that she would not do well in a large city type school system and would benefit from a smaller district. Do not pass these bills and force my daughter to go to school in a large city type school district (as this would combined us with Middletown) and put her back in the situation I took years to save enough money to move away from. If this passes I will have to consider moving out of state and taking my tax dollars with me, as will other families in town that I have spoken with.
