

I'm reaching out to say our family is against regionalization. We moved from a bigger town to a smaller town for the school district. Our children are thriving in their 'small' school. We love that their administrator and superintendent know our children. Imagine how much learning is taking place when a school district works successfully and their students feel they are cared for, like a family. We are proud of our school district and we have pride for our community. If our state leaders are working to do what's best for our state, how could they force a situation that would clearly not be best for so many school districts. Saying that this bill would not be forced today, only means it will one day.

Thank you,

Michael and Heather Nypert
