

Bill 457 and Bill 738

To whom it may concern -

Our family vehemently OPPOSES any actions that would combine our town's school system with another town, forced or by choice. We picked and moved into our town SPECIFICALLY for the school system it offered. We are sick and tired of government forcing changes that take away our family's CHOICE. The reality is that not every school is equal and you can't force it to be. Our family has worked very hard, ON OUR OWN, to make sure our family is able to be in a town with a good school system. The government needs to steer clear and let families make their choices of what schools and towns they want their families to grow in. We pay more property taxes than ever before, so now, more than ever, the choice and control should be with our family, not the government.

Thank you.
