

Bill 457 and Bill 738

To whom it may concern,

This initiative is very concerning and would essentially decimate one of the biggest draws to the state. For me, this would be the last straw and I would be looking to exit the state permanently with my family. I currently pay exorbitant tax rates but can justify having moved to a town with a great school system.

My colleagues and neighbors all agree on this. Whatever savings projection exists would be completely overshadowed by further population loss and all the revenue that goes with it.

This is a dangerous proposition.

Sincerely,
Edris Raji
