

Why are you as the elected officials of the state of Connecticut hell bent on further ruining our state!

When people move to our state, in many cases, they move to certain areas for the school system. Now you plan on taking away this reason for people to move to the state or even stay in the state. It is hard to believe that our leadership in a very myopic way, think that you can further impose their will on the people rather than representing the people they were elected to serve. I strongly oppose "Bill 457 and Bill 738" and urge that it not be considered
