

Bill 457 and Bill 738

I oppose the forced regionalization of school systems. Towns should retain their sovereignty to decide their own facility and built environment standards for educating their own children. If a Town wants a boutique atmosphere for their schools then it should remain their choice to do so. A Town's schools are also a significant factor in families choosing where to buy homes and raise families. Forced regionalization compromises both those choices and I do not support it.
