

February 19, 2019

To the State of Connecticut Education Committee Members,

I am strongly opposed to the bill to force school regionalization in Connecticut, SB 738.

I chose to move my family to Wilton CT largely because of the quality of the schools. The small schools, which are locally controlled, are one of the best things that attract people to Connecticut. Taking away that local control will greatly harm the quality of the schools and eliminate a large reason for people moving here.

The quality of education in our community should be protected and there is no proof that regionalization will either reduce costs. There is also no proof that this will do no harm the quality of the schools.

Please oppose SB 738 and any bill that forces regionalization of our schools.

Thank you

Eric Cameron
