To Education and Appropriations Committee,

I am highly opposed to Senate Bill 454 and 738 and Governor's budget bill regarding regionalization and consolidation for our education system in Senate Bill 874.

Weston has worked hard to maintain budgets in town to preserve and keep setting the bar high with regards to public education. Redistricting and consolidating school services and districts would negatively impact Weston's community, housing market, educational services and systems, and economy. Disrupting this balance that Weston homeowners and taxpayers, volunteers and citizens work hard to achieve and maintain, would be a grave disappointment for years to come.

Why don't we focus on health care costs transparency and other critical issues that are needed in the state of Connecticut.
