

To Whom It May Concern –

The idea to regionalize school districts is simply outrageous. Only a bureaucrat would assume they could regionalize school districts to achieve maximum efficiency. Education is best served at the local level, where decisions should be made. The Katonah-Lewisboro School district decided they would close Lewisboro school over in Westchester County, NY. The Goal was to cut the budget, but the savings were a mere \$700,000, and by the next year, the budget had resumed its growth on a \$60M budget. Absolutely ridiculous there, as it will be in New Canaan with this plan. This plan is not right. I will look forward to all the voters coming out and removing the architects of this plan from office.

Sincerely,
Roger
