

2-28-19

To whom it may be concerned:

I am unequivocally opposed to any forced regionalization bill, or one that becomes a study or pilot program for the following reasons.

Any intention to improve education results requires local decision making and less bureaucracy. Regionalization moves us in the wrong direction.

Please stop trying to control every decision and every factor in education. Reduce the bureaucracy and reduce the control and allow local decision making and local actions to better serve student needs. Decision making must be pushed all the way down to the student level to improve efficacy of education. Regionalization does the opposite. Stop it!
