

“Bill 457 and Bill 738”

Regionalization of CT Schools

I think that if back office and administrative services could be shared that would be beneficial. And offer additional classes to students. Ie shop, personal finance, customer service skills, design (computer or fashion), bookkeeping, environmental solutions, Skills where students can utilize immediately to gain employment. Details such as traveling teachers vs students travelling can be determined later. However, Possibly mobile classrooms for certain classes, that are shared by several schools.

Best regards
