Good Afternoon,

I am writing to oppose the bills concerning consolidating smaller school districts. I am a teacher in a small school district and am fearful that many wonderful teachers would lose their jobs because of these bills.

Would there be new schools built? Where would all the children consolidating go? Who would make the decision on where the towns would have their regional school?

These are all questions that would come up if I were to attend this meeting in person. A small school district is a strong community, with everyone well known, students and staff alike. We create a loving and caring environment, and can really support each students' growth.

Please reconsider these bills to consolidate smaller districts.

Thank you for your time,

Renee Kucharski
