

To Whom It May Concern:

I feel strongly that we should keep the school district of each town separate. As citizens, we have little influence on government policy on the state and federal levels aside from voting, but we do have a voice in our local town government and school administration. Don't take away that voice by making our school district's larger! I seriously doubt combining school districts will actually save taxpayer money. By contrast, I am confident that combining school districts will decrease taxpayers' say in how our schools are run.
