Electronic Testimony in Opposition to Senate Bill 738

Senate Bill 738 would negatively impact the quality of education in our currently outstanding schools at Regional School District 18. Families choose to reside in the Lyme/Old Lyme community because of the small town feel and small town quality of education that accompanies that. Our school system has produced, and will continue to produce, individuals with high levels of talent in fields ranging from engineering, to architecture, to the humanities. Senate Bill 738 would jeopardize the classroom experience that we are currently able to provide here in Lyme/Old Lyme and would therefore do a disservice to the state of Connecticut, and the next generation of our country.

Respectfully,

Philip Milnarik

Teacher

Regional School District 18
