

Bill 457 and Bill 738

I strongly oppose forced regionalization and I feel it will be another nail in the coffin of our dying state. This action will accelerate the exodus from CT. There are people who are hanging in there in low quality jobs only because of the stability of their kids schools, destroy that stability and they have no reason to stay. They will leave for better jobs in states with lower taxes before you even get the chance to try make this work. The rich and the smart will leave, the rest will remain and continue to elect whoever promises the best entitlements, until the system implodes.
