

Bill 457 and Bill 738

To the Democratic Party,

As a citizen of the state of Connecticut. I am utterly disgusted and dumbfounded that you would even consider these two bills. After the past couple years, of your former boss and Governor. Brilliant idea to redistribute money from towns to the cities. So the powers that be. Can squander more money. Even though the cities in this state receive more than any towns do for aid and educational budgets.

Now you want to take kids out of they're own towns and schools. And for what??? Put them on a bus for forty five minutes to be bused into they're new district? Taking time away from the classroom. Yet of course, the cities of this state will not be effected at all. The meet the criteria of student population and general population. So again, small towns lose. So why did my partner and I work so hard to move into the town of our choosing?

It is extremely frustrating to be a citizen and tax payer in this state. The middle class is taxed to no end. We fit bill for everything. And for what to have no choice in where are kids go to school?

Sincerely,

Jennifer L Vreeland
