

Hello,

I would like to voice my opposition to the three state bills being proposed that cover school district combination. My wife and I moved to Connecticut primarily for the great schools. Any plan to force the combination of school districts or financially coerce them to combine would drastically disrupt the ability for towns to maintain the high quality of their schools.

The school system in CT and especially Fairfield County is the crown jewel of the state as far as attracting new families to move. We are CT residents solely because of our schools.

Please consider the long term impacts on the states' residents. Many families may move away or never move here to begin with if the school system is compromised.

Thank you

David Williams
