

Dear Legislators,

We all know ( or should know) that forced school regionalization is part of a bigger agenda and it is not about saving money for the budget. What is happening is purposeful economic collapse to make it appear this is about money. When this move originates outside of localities and from those who have no right to make this happen, decision makers should be looking at the agenda and not just at the smokescreen reasons.

There is a strong agenda at the root of this and it is meant to remove local control, parental rights and change the American way that the government operates as planned by our Forefathers and which causes people the world over to want to live in the US. If you allow yourselves to fall victim to this agenda, you are not putting the your constituents' rights and interests first, before those in control of everything. Your decisions to regionalize will devastate us all. Please do the right thing, at least for our children's sake.

Thank you,

Sue Z
