

Dear Representatives--

I wish to express my strong objections to the following bills that have been proposed to begin regionalization in the State of Connecticut. Like many residents, I live in a town that has very high taxes but which has concurrently a very strong existing regional school system (Amity which is comprised of Bethany, Woodbridge, and Orange). We get virtually no services in town and the passage of these bills will be disastrous for those of us whose main investment is our dwelling. This will have a deleterious effect on our dwelling prices and it may prove to be the final straw that breaks our backs. These bills are poorly considered and must be tabled forever. I encourage all of you to bury these bills.

Philip Zwick
Woodbridge
