

sb 738, sb457, sb874, sb7150 **The strongest opposition to all bills**

Please add my name to the growing list of long time Connecticut residents vehemently opposing the above four bills. It has not been proven the first three bills would save money. They would serve only to eliminate local control and harm overall school quality in those communities, like Wilton, which have responsibly managed their school systems and budgets over the decades. I am likewise opposed to the commissioning of any study related to any of the above bills.

SB 7150, which I also vehemently oppose, is nothing more than a bill which would shift pension responsibilities which have been negligently managed by the State of Connecticut to local municipalities which have been fiscally responsible over the years. I likewise oppose its implementation or the commissioning of any study relating to the bill.

Sincerely,

Bruce Hume
