

Dear Members of the Education Committee. I'm writing to you because I oppose bill 874. Since my child was born, I knew I wanted to homeschool her. She has severe allergies which confirmed that decision. My Fiancé and I plan to homeschool our child and give her the best possible future she can have. We homeschoolers do not need to be regulated. Homeschooling works for us as a safety measurement to prevent her from her allergen exposures, we also get to work with our child one on one. You do not see public schools giving our children the one on one attention that homeschoolers get. Homeschooling is better for our schedules as working adults. We can work our child's schooling with our schedules and give her all the time and attention needed. We do not need to check in with a school system. School systems fail our children, lack of education, funding, teachers, supplies, curriculums. We can provide our child with everything that they need that public schools can't.

Thank you for hearing me as to why we oppose bill 874.

-Molly Inman
