

I have been living in CT for 45 years and you people have convinced me to purchase a house in FL. You are driving out residents because of all the stupid ideas and mismanagement of taxpayer money! You should all be ashamed! How can Hartford people make decisions for us in Fairfield County? Our schools are good, so why break them? The only winners of forced school regionalization will be the consultants you hire to perform the study and provide the results as you see them! Besides colorful slides, the execution of the effort will be a disaster after the consultants leave. Why don't you review the results of the DMV system replacement costs and problems of a few years ago! Do you think forced school regionalization will be any different?

Martin Katz. Wilton
