

Dear Sirs and Madams,

I am writing concerning SB874 with the proposed additions in sections 17 and 18 concerning the registering, in person, of homeschool students and the offer of unneeded curricula for their parents. The homeschooling statutes that were worked out years ago by legislators and homeschool educators has succeeded in graduating thousands of students ready for college, the military, manufacturing, civil service and every other area of work in our great state. We graduated two of them ourselves.

Please vote "NO" on these unnecessary additions to this legislation.

If any of you would like to discuss this further, my husband and I would be happy to meet with you or take a phone call.

Sincerely,

Wesley and Barbara Marsh
