

Dear CT Government,

I think passing bill SB-874 is not the best for our state. However, sections 17 and 18 stand out to me the most. I am a ninth grader that is home-schooled, and these sections would affect me because the reason I left public school is to learn at my own pace. If this bill gets passed then people like me will have the same issues at home, this could lead to more kids getting frustrated to the point where they turn to drug use. There are many other things that could happen, so take a moment and think will this help anyone? However, this just my opinion, so do what you think is right.

Best Regards,  
Gabriel Nolan
