

In reference to Bill number SB 874;

I Marra Pelletier of Columbia, CT oppose Sec. 17 and Sec. 18 of SB 874. It is unnecessary for homeschool families to register with public school districts yearly in order to homeschool. There is no explanation or reason given for this proposal, and it is an unnecessary restriction of homeschooling rights. There is nothing that my towns public school can give my child that I can not, there would be absolutely no need and no benefit for either myself or the school system to have my family register yearly. I also personally have no need for a model of educational "framework" in order to teach my children, and any homeschooling family who would like that currently has access to it without the "help" of this bill.

Respectfully,
Marra Pelletier
