

We live in New Canaan and have two children who attend the public schools.  
We moved to New Canaan because of the high ratings / standing of the public schools. The public schools in our community have consistently been amongst the top schools in the state.

We strongly oppose the regionalization of school districts as it would negatively impact our outstanding schools. Regional consolidation takes away local control. The strong sense of community diminishing parents and community members voices, which then negatively impacts our children's educational experience.

Regionalization and it's one size fits all approach would be detrimental to our schools.
