Explanation

The bill increases the penalty for certain cases of assault in the second degree with a firearm and extends protections against criminal lockout to commercial lessees. To the extent that the bill results in increased or new violations, the bill results in a potential cost for incarceration or probation supervision and potential revenue from fines. On average, the marginal cost to the state for incarcerating an offender for the year is \$1,800¹ while the average marginal cost for supervision in the community is less than \$700² each year.

The bill makes additional changes that do result in a fiscal impact.

¹ Inmate marginal cost is based on increased consumables (e.g. food, clothing, water, sewage, living supplies, etc.) This does not include a change in staffing costs or utility expenses because these would only be realized if a unit or facility opened.

² Probation marginal cost is based on services provided by private providers and only includes costs that increase with each additional participant. This does not include a cost for additional supervision by a probation officer unless a new offense is anticipated to result in enough additional offenders to require additional probation officers.

The Out Years

The annualized ongoing fiscal impact identified above would continue into the future subject to inflation.
