Note: GF=General Fund

Municipal Impact: None

Explanation

The bill expands the crime of voyeurism to include a reasonable expectation of privacy and results in a potential cost for incarceration or probation supervision and a potential revenue gain from fines. On average, the marginal cost to the state for incarcerating an offender for the year is $1,800\(^1\) while the average marginal cost for supervision in the community is less than $700\(^2\) each year.

The Out Years

The annualized ongoing fiscal impact identified above would continue into the future subject to the number of violations.

\(^1\) Inmate marginal cost is based on increased consumables (e.g. food, clothing, water, sewage, living supplies, etc.) This does not include a change in staffing costs or utility expenses because these would only be realized if a unit or facility opened.

\(^2\) Probation marginal cost is based on services provided by private providers and only includes costs that increase with each additional participant. This does not include a cost for additional supervision by a probation officer unless a new offense is anticipated to result in enough additional offenders to require additional probation officers.
