

I am in favor of the Resolution proposing an amendment to the State Constitution to allow for early voting and no-excuse absentee voting. In this day and age, we have to be more flexible with times and ways for people to vote. We need to encourage voting not discourage it. I have worked at the polls on election day and see how difficult it is for parents with children, older people, and working people to wait in line on one particular day. Time and time again I hear that people won't vote because of the weather, not feeling well, or they had to work two shifts. If people could plan ahead and could vote by absentee or on an earlier day, there would be more participation in our elections.

Thank you,
Elizabeth Duarte
