

Dear Government Administration and Elections Committee,

RE: HOUSE JR 161

I support early voting in our State of Connecticut. We should adopt early voting to join the other 39 States who already offer that convenience and adapt to the needs of the twenty-first century.

Early voting helps seniors and other persons who may find it difficult to make it to the polls on one particular day.

It will help the election process by alleviating long lines at certain polling places, and by hopefully making it easier for the Registrar of Voters to process the ballots that are cast.

As citizens we should do anything possible to make it easier for us to participate in our civic duty and to vote in our elections.

Early voting is popular with the overwhelming majority of Americans and it will benefit the State if Connecticut adopts early voting.

Many thanks for your consideration.

Sincerely Yours,
Christina Fagerstal
