

I support the bill HJ 161, which will implement early voting in the state of CT. Anything we can do to make voting easier and more convenient will support a healthy democratic process by making our state legislature more truly representative. Many people struggle with work schedules and care giving issues on election day: give those people the flexibility to exercise their vote and the level of participation in elections will increase. Many states have early voting : it is a proven success.

Thank you,
Melinda Fields
