Subject: SB #54

Dear Sirs,

While I agree with the privacy of information, as a business owner/Landlord how am I to make good business decisions if I am not able to evaluate the character of perspective tenants if I am not allowed to see they have a criminal record? This is a basic question on a job application, is the intent to block employers from doing criminal background checks also. Which we know that will never be passed, so why is my business and its success any less important then the corporations conducting business in CT.

If this bill is passed you are not only putting my investments in jeopardy of being able to be successful with the ability to continue to pay my bills, you are also opening the door for creating a significant life and safety issue for me and my family as well as any other tenants that reside in the property.

Please do not pass this bill!

Regrads,

Robert Eickmeyer
