

To Whom This May Concern,

I oppose Bill #7266. The language in this bill would require automobile repair shops to conduct repairs with the original manufacturer. Automotive Recyclers would be eliminated from supplying these parts. Automotive Recyclers are committed and efficient finding replacement parts and equipment for all automobiles and the repair shops fixing the cars. This bill would eliminate work and possible jobs for the Dismantlers and their companies. This bill would not be good for the automotive recycling industry. I oppose this bill.

Sincerely,
Valerie Petrillo
