HB 7218 Safe Storage of Firearms in the Home March 6, 2019

Testimony
This is more harassment aimed at making it more difficult to keep guns by making the legal aspects far more complicated and potentially costly than they should or need to be. There is very little demonstrated need for such overreach beyond a very few incidents that are more due to simple carelessness and stupidity. Bills like this one do nothing to address the problem which is a need for better training and prevention instead of making gun owners liable for jeopardy. (How many under 18 year olds get the keys to the car or access to the knife drawer in every home in the state?)
Oppose this bill. It serves no honest or useful purpose.

Thank you.
